

## **NOTICE TO RESIDENTS**

**AUGUST 11, 2017**

**2017 RESURFACING PROGRAM  
WASHINGTON – MACK TO CHALFONTE  
LAKELAND – WATERLOO TO KERCHEVAL  
LAKELAND – JEFFERSON TO END**

The City has contracted with Pro-Line Asphalt Paving Corporation to resurface your street this year. The construction is funded by the Road Improvement Millage and is anticipated to begin on August 14<sup>th</sup>. The project will include the replacement of the existing catch basins and connecting storm sewers, removal of the existing curb, construction of a new concrete curb and gutter, milling off of the existing asphalt surface, repairs to the existing road base and the placement of a new asphalt leveling and wearing surface. The pavement repair work will also include the removal and replacement of all or part of your driveway approach.

The catch basin and storm sewer work will be starting on Washington on Monday, August 14<sup>th</sup> then move to Lakeland from Waterloo to Kercheval and then to Lakeland from Jefferson to the end. Once the storm sewer work is completed, the contractor will start replacing the curbs and drive approaches in the same order. It is anticipated that the entire project will take approximately 3 months to complete.

**While the curbs and your drive approach are being replaced you will not have access to your driveway and will have to park your vehicle on the nearest side street. You will be notified in advance of being temporarily without the use of your driveway. If you are handicapped, please contact Stephen Pangori (586) 726-1234 so that special arrangements can be made. There will be no interruption of emergency services at any time during construction.**

During the base repair and resurfacing work, access to your driveways will be maintained as much as possible, but it may be necessary at times to park on side streets.

To allow the Contractor to perform the pavement repair, no parking will be allowed on your street. It is absolutely necessary that vehicles not be parked on either side of the street during the construction.

If you are within the construction area and have a sprinkler system along the curb, please mark your sprinkler heads in this area. This will allow the contractor to attempt to avoid unnecessary damage to your system. If damaged, your system will be repaired during restoration of the project.

You will be notified when the placement of the new asphalt surface is scheduled to take place. When this happens, please turn off your **AUTOMATIC LAWN IRRIGATION SYSTEMS** on the night prior to resurfacing and refrain from cleaning driveways, washing cars, etc.

During construction, mail delivery and rubbish pick-up will not be interrupted.

The City of Grosse Pointe wishes to apologize in advance of the impending construction for any inconvenience it may cause you and hopes, with your cooperation, to complete the construction in a timely manner.

If you have any questions or concerns, please feel free to contact any of the following:

Contractor: Pro-Line Asphalt Paving Corporation (586) 752-7730

Engineer: Anderson, Eckstein and Westrick, Inc
